National Championship racing headlines Round 3 of SAMRC

The South Australian Motor Racing Championship roars into Shell V-Power Motorsport Park with a massive weekend of State and National Championship-level motorsport.

Leading the charge is the opening round of the newly introduced AU4 Championship, showcasing the latest-generation Formula 4 Tatuus cars. These next-gen open-wheelers bring elite performance and fierce competition, as the future stars of Australian motorsport go head-to-head.

Joining the AU4s is a diverse lineup of crowd favourites including Circuit Excel Trophy and Masters, SA Sports Sedans, Improved Production, SA Aussie Racing Cars, Saloon Cars and HQ Holdens – each featuring a host of visiting interstate drivers.

Each category delivers its own unique brand of racing, all on one of the country's most demanding and rewarding circuits.

Shell V-Power Motorsport Park isn't just a racetrack—it's a motorsport hub. With trackside accommodation at Rydges Pit Lane Hotel, drivers and teams can stay right in the heart of the action, making between-session preparation smoother than ever.

When engines go quiet, APEX Bar x Dining offers quality meals and a relaxed atmosphere overlooking pit lane—ideal for team debriefs or unwinding after a big day on track.

As an added bonus, The Bend and Motorsport Australia have partnered with nationally recognised leader in tyre and rubber resource recovery, Tyrecycle to provide SAMRC competitors with free disposal of their used race rubber.

So prep the car, load up the trailer, and bring your A-game, SA Motor Racing Championship is back at The Bend!

Adam Brook
Motorsport & Operations Manager
Shell V-Power Motorsport Park

A ResourceCo Company

FREE tyre disposal - exclusive to the SA Motor Racing Championship

Motorsport Australia and The Bend have partnered with Tyrecycle Australia to launch a tyre recycling pilot program at the South Australian Motor Racing Championship on 23-25 May.

As a significant waste product of our sport, the ability to recycle race tyres post event at scale is a shared goal. This pilot aims to understand the feasibility of integrating tyre recycling logistics into motorsport events. This pilot program showcases motorsport as a testing ground for circular economy practices, with Tyrecycle providing the critical link between tyre disposal and material reuse.

Tyrecycle is a nationally recognised leader in tyre and rubber resource recovery. It's extensive processing network and commitment to environmental compliance make them an ideal collaborator in trialling a sustainable solution for recycling race tyres.

Their involvement ensures that every tyre collected during the event is transported, processed, and recycled through responsible, traceable channels.

Tyrecycle representatives will be on the ground across the weekend to help competitors and teams with tyre deposits and to answer any questions.

Simply present your tyres to the Tyrecycle staff located in the pit paddock and they will be recycled at no cost to you.

Your support of this pilot is greatly appreciated.

FRIDAY 23RD MAY (PRACTICE DAY)
